1. ATTENTION!!!

Depending on the vehicle's model and firmware version (stars near control unit code) should be done:

* Load adequate vehicle configuration from the list available in Direct Injection 3000 software. List is available in the bookmark: CONFIGURE / VEHICLE / VEHICLE PARAMETERS (draw. 1).

Draw. 1. List of vehicles.

** Load adequate vehicle configuration with the bookmark „UPLOAD FILE” (draw. 2) available in Direct Injection 3000 software. In order to get appropriate file, please contact with Technical Department of Elpigaz company.

Draw. 2. Bookmark „Upload File”.

*** Load adequate firmware with the bookmark „REPROGRAM” (rys. 3) available in Direct Injection 3000 software. In order to get appropriate file, please contact with Technical Department of Elpigaz.

Draw. 3. Bookmark for ECU reprogramming with adequate firmware.

LIST OF CARS WITH DIRECT POINT INJECTION ENGINES SUPPORTED BY OUR LPG SYSTEM

2. ATTENTION!!!

If there are few types of firmware version (ex. 2 or 3 types) for specific vehicle, it is recommended to load at first the newest version of firmware (the highest number). If the run of the car is incorrect after loading the newest firmware version, oldest versions of firmware should be loaded and checked for correct run.

3. ATTENTION!!!

Non-failure functioning of installation is guaranteed only if:

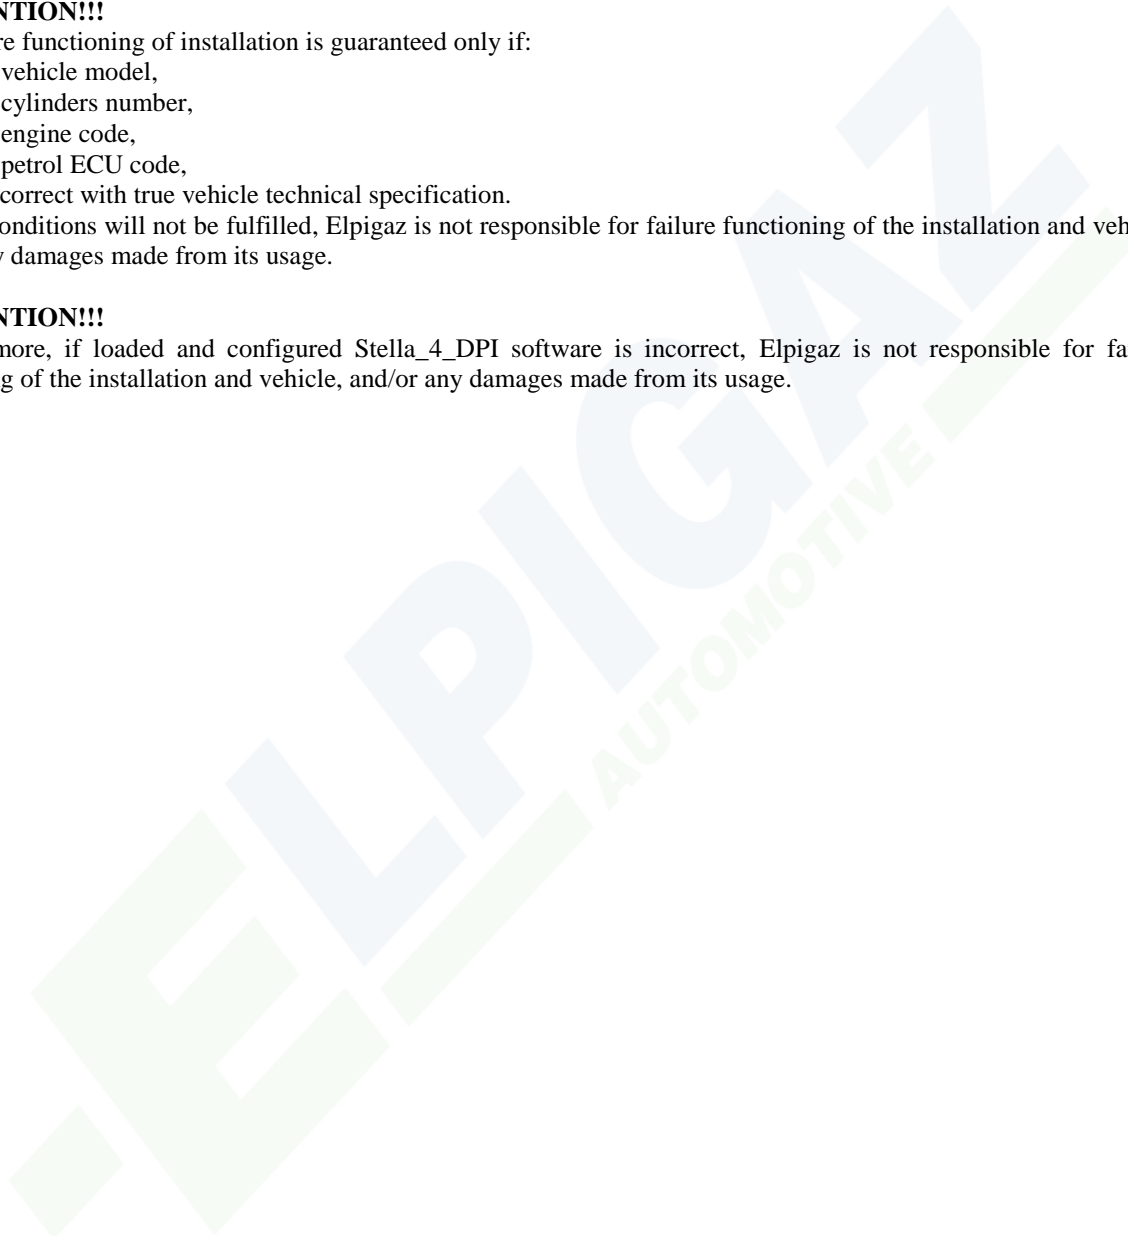

- vehicle model,
- cylinders number,
- engine code,
- petrol ECU code,

are 100% correct with true vehicle technical specification.

If above conditions will not be fulfilled, Elpigaz is not responsible for failure functioning of the installation and vehicle, and/or any damages made from its usage.

4. ATTENTION!!!

What is more, if loaded and configured Stella_4_DPI software is incorrect, Elpigaz is not responsible for failure functioning of the installation and vehicle, and/or any damages made from its usage.
